- **Secure Numbers**—for privacy in entering personal codes
- **50-name and number Directory**
- **Eight programmable memory keys**
- **Five-number redial**

ASTRA
Telecom

The 9316 CW takes the mystery out of who's calling. Equipped for Caller ID and Call Waiting Display, the 9316 CW shows you who's calling, even when you're on another call*.

The 9316 CW takes call control a step further, with SuperFlash and the Intelligent Viewing System. Even if another extension is off the hook, you'll be able to see who's waiting on the line. And, you'll be able to access the waiting call from any extension. The LINK key lets you switch between calls without worry of accidentally disconnecting a caller.

Outgoing calls are easy, too, with the 9316 CW. On-hook dialing and a high quality speakerphone mean you can make calls without ever picking up the receiver. Program the memory keys with frequently called numbers or feature codes, like your Voice Mail access number. The Secure Numbers feature protects your privacy by letting you enter passwords or personal codes without revealing them on the display.

You can even create your own Directory, so the numbers of business contacts and family members stay right at your fingertips, for fast and easy dialing.

The 9316 CW offers a host of convenient features that meet the needs of today's busy families and businesses. When it comes to saving time, it's no mystery that the 9316 CW is the right phone for the job.
