- Handset G955, the powerful voice and messaging DECT phone for office users
- Handset I755 for use in industrial or demanding environments
- M155 Messenger for use in healthcare and hospitality
- Diverse features and applications

A simple, secure, feature-rich solution

A choice of DECT handsets fulfils the needs of mobile users ranging from basic telephony up to feature-rich voice and messaging facilities in an office environment. For potentially demanding environments such as industrial areas, warehousing, retail and hospitals a robust handset is available to fulfill the specific requirements in these organizations.

A DECT handset for every user

- For basic voice communication restricted to one area (one DECT or IP DECT system), the C124 DECT handset is a cost-effective yet powerful communication device
- Office users who require more functionality and an appealing, easy to use handset will benefit from the G355 handset. The G355 handset is a powerful communication device with central directory access (phone book) and headset support, suitable for multi-site DECT environments
- The G955 handset is the most sophisticated handset available for mobile users, delivering the optimum in voice and messaging communication. In addition, users can benefit from an optional Bluetooth headset
- The I755 handset is ideal for use in industrial environments, retail, warehousing and hospitals. It provides messaging plus personal security features such as an SOS-key, alarming and man-down detection for potentially life-threatening situations
- The M155 Messenger is ideal for use in healthcare and hospitality environments. It is a real DECT telephone but small as a pager device and can be used to send and receive alarms and messages

Key features of Business Mobility handsets

All Business Mobility DECT handsets offer excellent mobile voice communication: crystal clear speech, loudspeaker and hands free support, seamless handover and roaming, high security with DECT authentication, and seamless integration with features on the PBX platform. All DECT handsets have an appealing design and are easy to use. The DECT standard does not interfere with other frequency bands.

Distinctive ring tones distinguish internal and external calls (or messages), and audible indicators inform the user about

the status of the handset. Corporate directory support is available on the G355, G955 and I755 handsets. Messaging features are available on the G955 and I755 handsets, to support alarming and messaging. The I755 handset is robust and dust and (splashing) water proof (IP54) and has additional personal security options such as an SOS-key and man-down detection with associated alarming. Most handsets can be equipped with a memory card to store local user data and the subscription data of the handset. M155 Messenger is ideal for healthcare and hospitality environment, both for messaging as well as calls.
