- 1 Press the volume up button  on the headset inline control to increase listening volume.
- 2 Press the volume down button  on the headset inline control to decrease listening volume.

- Mute a Call
- 1 During a call, press the mute button on the headset inline control to mute the microphone. When mute is on, the mute LED is solid red (you will still be able to hear the caller).

- 2 To turn mute off, press the mute button again.

Plantronics Hub Software

Plantronics Hub software must be downloaded to access the Plantronics Control Panel. Install Hub software by visiting plantronics.com/software and click on the download button.

Plantronics Control Panel

User preferences and device settings that affect the performance of your headset can be changed using the Plantronics Control Panel.

To access the Plantronics Control Panel, load Plantronics Hub software by visiting plantronics.com/software and click on the download button.

To start this utility, click Start > Programs > Plantronics > Plantronics Control Panel.

Applications tab

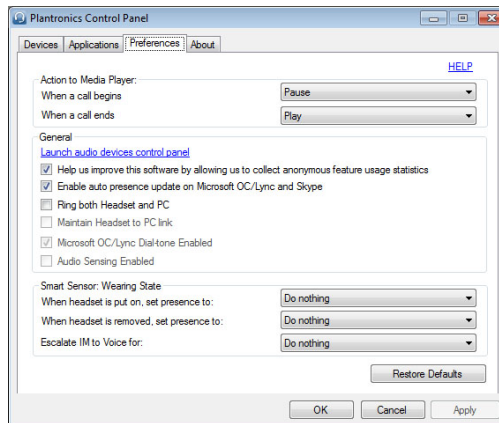

The Applications tab displays the status of Plantronics support for various applications such as softphones and media players.

Preference Tab

Allows you to set preferences for:

- **Media player** Modify call action: Pause, Play, Mute or Do Nothing
- **General use**
- **Presence status based on wearing state (dependent upon softphone compatibility)** When headset is put on, or removed set presence to: Available, Busy, Do not disturb, Be right back or Offline

About tab

Provides online access to the user guide and support and displays your headset system's information.

Plantronics Manager Pro

Additional device management tools are available for IT Managers via Plantronics Manager Pro, which includes the following features:

- Enable or disable device settings according to company policy or for regulatory compliance
- Lock down settings so they may not be changed by the user
- Monitor audio device settings and usage in near real time
- Generate inventory and usage reports to manage asset utilization

Troubleshooting

Headset

I cannot hear caller.

Listening volume is too low. Press the volume up button on the headset.

The USB headset is not set as the default audio device. Use the audio settings in your sound control panel/preferences to select your headset as the default audio device.

For Windows XP systems

- Go to Control Panel > Sounds and Audio Devices > Audio tab.
- Select your headset as the "Sound playback" default device.

Supported Operating Systems: Windows Vista, Windows 7, Windows 8, 8.1

- Go to Control Panel > Sound
- Highlight the headset, select the Set Default > Default Communications Device from the drop-down list and click OK.

For Mac OS X

- Choose Apple menu > System Preferences > Sound > Output tab.
- Select your headset in the "Select a device for sound output" window.

Callers cannot hear me.

Headset is muted. Press the mute button to unmute the microphone.

Headset microphone boom aligned incorrectly. Align the headset boom with your mouth.

The USB headset is not set as the default Voice device. Use the audio settings in your sound control panel/preferences to change the input device.

For Windows XP systems

- Go to Control Panel > Sounds and Audio Devices > Audio tab.
- Select your headset as the "Sound recording" default device.

Supported Operating Systems: Windows Vista, Windows 7, Windows 8, 8.1

- Go to Control Panel > Sound > Recording tab.
- Highlight the headset, select the Set Default button and click OK.

For Mac OS X

- Choose Apple menu > System Preferences > Sound > Input tab.
- Select your headset in the "Select a device for sound input" window

The sound in the headset is distorted.

Lower the listen volume on your softphone until the distortion disappears.

I can hear an echo in the headset.

Adjust volume on headset.

The other headset I was using to listen to music does not work any more.

The USB headset will set itself as the default audio device in Windows. Use the audio settings in your sound control panel/preferences to change the audio device.

For Windows XP systems

- Go to Control Panel > Sounds and Audio Devices > Audio tab.

- Under "Sound Playback", change the default setting from your headset to your device choice.

Supported Operating Systems: Windows Vista, Windows 7, Windows 8, 8.1

- Go to Control Panel > Sound > Recording tab.
- Highlight your device choice, select the Set Default button and click OK.

For Mac OS X

- Choose Apple menu > System Preferences and click Sound.
- Click Output, and then select "Internal Speakers" or your device choice.

My headset stops responding to button presses.

When a PC goes into standby or hibernation, the USB headset no longer is powered on. Be sure your PC is in an active state.

Smart Sensors

The "Auto Answer call" function is not working.

Make sure the speaker capsule is placed on your ear so the ear cup makes good contact with your ear.
