

DA Series of USB-to-Headset Adapters

Harness the Power of Voice over IP

Cost savings, portability, a range of new providers and call features has made VoIP the ideal tool for phone-intensive organizations. Plantronics delivers a four-model series of USB-to-headset adapters to help contact centers and other businesses derive maximum value from their VoIP investments. Paired with a Plantronics professional headset, our adapters infuse digital-signal clarity into every VoIP softphone communication. A variety of features and pricing options ensure the right fit for all professional environments.

- **Improve ROI.** Benefit from VoIP economy and productivity while maintaining enterprise-class performance.
- **Leverage existing investments.** Migrating to a VoIP infrastructure? The DA series of adapters are compatible with your current Plantronics headsets.
- **Enhance customer interactions.** High-quality audio translates to smoother, more concise customer communications—and improved satisfaction.
- **Experience wideband audio.** The DA45™ and DA40™ adapters offer wideband compatibility for crisp audio sound and lower listener fatigue.
- **Choose from a range of solutions.** Entry-level, mid-range and premium solutions fit into contact centers and enterprises worldwide.

DA60™ and DA55™ Adapters
Clearline™ Audio for Superior Voice Communications

Ideal for VoIP-based contact centers and offices using softphones, the DA60 features robust digital technology and PerSono Pro™ 2.0 software for unparalleled command over voice and audio quality. The DA55 adapter delivers digital audio excellence to contact centers, other VoIP-based organizations and to remote employees using softphones.

- Clearline™ audio reduces the level of loud noise on incoming calls to a comfortable level.
- Advanced echo cancellation ensures clear, natural conversations.
- Inline volume and mute provide convenient access and control. (DA60 only).
- Quick Disconnect™ (QD) capability allows the headset to detach without losing the call.

DA45™ and DA40™ Adapters
Wideband Audio

The DA40 and DA45 adapters work with all of Plantronics H-series headsets—including the latest wideband models—to deliver outstanding audio quality, reliability and a choice of wearing styles. The DA40 adapter is the most economical enterprise-class solution available, while the DA45 delivers superior sound with one touch controls.

- Wideband audio support provides clear, natural speech and lower listener fatigue.
- Echo management ensures natural conversation even with VoIP latency. (DA45 only).
- Inline control offers volume, mute (with LED indicator), and easy call answer/end features. (DA45 only).
- Quick Disconnect™ (QD) capability allows the headset to detach without losing the call.
