

Venture Three-Line Telephone

For small businesses, home offices, or homes with multiple lines, Venture delivers sophisticated, multiline-system features without the investment or installation hassles of a key system.

Key Features:

- **Three-line analog telephone**
- **Expandable**—grows to a system of up to eight stations
- **Integrated Call Display and Visual Call Waiting**—show you who's calling, even when you're on another call*
- **Full-duplex speakerphone with AudioEdge**—for exceptionally clear, natural-sounding handsfree conversations
- **Built-in handsfree intercom**
- **200-name and number Directory**
- **Network-based system**—works with other Venture telephones, with no centralized controller required
- **Quick and easy installation**—install the system yourself and start using it immediately

Thousands of home offices and small businesses share a common dilemma: how to get the advanced, hard-working communications systems needed in today's competitive marketplace—without the investment and installation hassles.

With the Venture three-line telephone, you have the solution. Venture is the first KSU-less system offering integrated Call Display and Visual Call Waiting* right on the telephone. Because the system intelligence is loaded into the phone, no centralized controller is required.

Venture delivers the same features usually found on more expensive PBX and key systems, making sophisticated capabilities like intercom, shared directories, conferencing, and call transfer available to small businesses, home offices, and multi-line residences. There's no training needed, because prompts on Venture's display window tells you exactly what to do.

The full duplex speakerphone includes digital signal processing and a tiny "ported" loudspeaker that delivers a "big speaker" sound. The result? Exceptionally clear, natural-sounding handsfree communication you can really use.

Venture can grow right along with your needs—from a single telephone to an eight-station system. And best of all, installation is a snap. In many cases, Venture can be used with your existing wiring. Just follow the simple step-by-step display prompts on the screen to set the options and customize the phone to your needs. Nothing could be simpler!

Venture offers impressive capabilities in one easy, affordable system. That's a solution to everyone's dilemma!
